

# dermalogica professional treatments in a medical setting

## Dermalogica treatments using oxygen therapy

**For a professional Dermalogica treatment center that offers oxygen therapy, it is important to:**

1. Review the Consultation Card to provide an in-depth consultation of your patient/client's skin ensuring they are a candidate for treatment.
2. Ensure the skin is in optimum health to reduce possible complications.
3. Never leave your client unattended.
4. Use Dermalogica professional products that are suitable for the patient/client's current skin condition.
5. Directions and protocols may differ from machine to machine; always consult the manufacturer for exact protocols and product usage for your particular machine.

### Dermalogica professional procedure with oxygen therapy

1. Cleanse eyes and lips with **Soothing Eye Make-Up Remover**.
2. Perform the Dermalogica Double Cleanse; beginning with **PreCleanse** followed by the prescribed Dermalogica cleanser. Remove with clean water and sponges or a steam towel customized with botanical mixer.
3. **Face Mapping® skin analysis** should be performed to ensure the skin is not contraindicated to an oxygen therapy procedure.
4. Complete a customized exfoliation treatment according your patient/client's skin needs and level of reactivity.
5. Perform the oxygen therapy treatment. Consult your manufacturer for proper use and application in conjunction with your machine.
  - a. **For automizing:** Combine the prescribed Dermalogica complex or botanical mixer with distilled water and automize onto the skin. Follow with an application of the appropriate Dermalogica masque. All Dermalogica complexes and botanical mixers can be automized onto the skin using oxygen therapy.
  - b. **For use with an oxygen mask:** All Dermalogica complexes and botanical mixers can be layered onto the skin in combination with one of our Dermalogica masques or moisturizers when using oxygen therapy. You would then follow with the application of your oxygen therapy; consult your manufacturer for proper use and application in conjunction with your machine.
6. Spritz according to your patient/client's skin condition select from **Multi-Active Toner**, **UltraCalming™ Mist** or **Antioxidant HydraMist**.
7. Finish the treatment with an application of the prescribed Dermalogica moisturizer, eye treatment and **Daylight Defense**.

**Note: When using MultiVitamin Power Exfoliant, Exfoliant Accelerator 35 or any professional exfoliation, under no circumstances should you leave the patient/client unattended in the treatment room. Monitor for excessive redness and remove immediately as directed if a reaction occurs.**
